Cast Iron Beauty That is Built To Last...
Introducing the Rockport™ Wood Stove by Lopi®

The Rockport™ combines cast iron beauty with optimum heat performance and solid construction to bring you the perfect mid-sized wood stove.

The new Rockport™ wood stove features an elegant, clean design with beautiful European castings, bold lines and attention to detail. This stove is the perfect medium size and will complement any home's décor with its sleek appearance, gentle curved shape and large 173 square inch fire viewing area. Artfully crafted from the finest grade materials, the Rockport™ is one heavy-duty stove that will provide years of dependable warmth and comfort.

Like its larger counterpart, the award-winning Cape Cod®, the Rockport™ features revolutionary Hybrid-Fyre® technology, making it one of the cleanest burning and most efficient wood stoves in the world! The Rockport™ boasts an impressive 0.8 grams of emissions per hour and a 84.5% LHV, 78.4% HHV Overall Heating Efficiency (OHE). This allows you to use less wood while burning hotter fires for longer periods of time, saving you money on your heating bills.

The Rockport's full convection heat exchanger provides maximum radiant and convective heat that can warm living spaces up to an impressive 1,800 square feet. Its 2.15 cubic foot firebox can hold 20-inch logs with up to 10 hours of burn time. The Rockport™ features a large self-cleaning ceramic glass viewing area on an extra wide door that opens up past 90 degrees for convenient wood loading. When closed, the door's knife edge seal and locking handle prevent any possibilities of air leakages and ensures maximum safety. Standard features like the easy glide large capacity ash pan and the single control bypass damper make starting and maintaining fires easier than ever with the Rockport™.

The Rockport™ also features the revolutionary GreenStart™ Igniter option which allows you to start this stove simply with the push of a button! Starting your wood stove or refreshing old fires has never been easier than with GreenStart™.

Imagine A FIREPLACE IN EVERY ROOM®
