

Arched Flush Wood Plus Cheat Sheet

The Arched Flush Wood Plus has several unique features and characteristics that require special attention during installation and set-up. Refer to the owner's manual for full details.

- **This insert uses new, three-piece surround panels**

This insert uses the following three-piece panels. These panels attach in the same manner as the panels for the Flush Wood. NOTE: The flush wood panels will fit on this insert, but holes will need to be drilled to secure the emblem to the panels.

	Width	Height	Part#
8" Panels	45-1/2"	29-1/2"	96100346
10" Panels	49-1/2"	31-1/2"	96100347
12" Panels	53-1/2"	33-1/2"	96100348

- **This insert works in zero-clearance (metal fireplaces)** Unlike the Flush Wood, this fireplace insert works in zero-clearance fireplaces. See the manual for details on installation.

- **Existing Flush Wood faces work with this insert**

Existing Flush Wood faces attach in the same manner to this insert.

- **This insert uses a single door for easier, one-handed, operation**

New door design simplifies loading and allows for quicker firebox access.

- **Insert has a smaller depth (17-3/4" vs. 20-1/2") than the Flush Wood**

This insert has been revised to allow for installation in more fireplaces. See the manual for complete details.

- **Ash Guard**

The included ash guard prevents ash from exiting the door opening. It is shipped detached to prevent damage during shipping.

Install the ash guard as shown below.

Note how the horizontal tab fits in front of the door opening.
