The Most Versatile and Stylish Electric Fireplace

The most extraordinary feature of the 564 Electric Fireplace is all of the beautiful face designs and style options that allow you to create a customized look for your fireplace. No other electric fireplace offers as many versatile design options that accompany a wide range of styles, from traditional to contemporary and everything in between.

Five different faces are available to choose from that have their own unique look and feature stunning detailing. These faces surround 564 square inches of glass*, showcasing the glowing flames and enhancing the fire view.

The fire display on this fireplace is remarkable, resembling burning wood and glowing flames. Several decorative interior display options add to the versatility of this fireplace and allow you to customize the look of your fire even more. A glowing log set with glowing embers is perfect for achieving a traditional look, while Platinum, Orange or Mixed Glass media offers a contemporary element to complement your fire display. You can enjoy the ambiance of the fire 365 days a year with or without the heater on.

The 564 Electric Fireplace can be added to any room in your home in less than an hour. It simply plugs into a 110 volt standard wall outlet and requires no chimneys or venting. This fireplace is ideal for apartments, condos or small living spaces.

Easy To Live With

Unlike a normal fireplace, the glass on the 564 Electric Fireplace does not get too hot to touch, reducing hazards for children and increasing safety all around. The easy-to-use remote control makes operating your fireplace simple. The features on this remote control allow you to adjust every aspect of your fireplace, from heat output to several display options. This functional remote control makes owning a Fireplace Xtordinaire electric fireplace even more enjoyable and practical.

Economical To Use!

A built-in 1500 watt heater with a circulating fan provides gentle warmth for any room up to 400 square feet. This feature makes it ideal for providing supplemental heat to bedrooms, offices and other intimate spaces.

The 564 Electric fireplace operates at almost 100% efficiency – because of the low voltage LED lights, almost all of the power used goes into warming the room. The 564 Electric Fireplace produces no carbon monoxide or emissions because there is no combustion.

The cost to operate the 564 Electric Fireplace averages approximately 3 cents an hour with the flame on for ambiance, and 8 cents an hour when both the flame and heater are on**. A 15 AMP, 110 VOLT wall outlet is required. A dedicated circuit is preferred, but not essential.

DECORATIVE FACES

The “Original” Fireplace Xtrordinair **CLASSIC ARCH™** face is our most popular fireplace face. This combination of a curved glass area and arched top line has proven timeless in its appeal to homeowners across North America. The delicate design of the heat exchange area has the appearance of woven lace, and the graceful arched opening highlights the viewing glass.

Metallic Black Paint - 36 1/8" W x 29" H

The **FRENCH COUNTRY™** arched face offers a unique look to compliment this fireplace. Its floral garland design frames the fire and adds a charming touch to both traditional and contemporary style rooms.

Metallic Black Paint - 36 1/8" W x 29" H

The **METROPOLITAN™** face design features the same beautiful grillwork of the Classic Arch Face, but in a more linear, contemporary style. The beveled edges of the Metropolitan Face also create an intriguing, three-dimensional appearance.

Metallic Black Paint - 36 1/8" W x 29" H

The **ARTISAN™** hand-hammered face design and craftsmanship are reminiscent of the ironwork in the Great Lodges of Europe and America. The Artisan face is hand-forged and hammered by master blacksmiths. Each face bears unique, subtle characteristics from the hands of its creator, making it an individual work of art in iron.

The wrought iron window detail of chiseled and twisted steel accents the soft curve of a large glass viewing window.

Charcoal Paint -
36 1/8" W x 29" H

Hand-Rubbed Bronze Patina -
36 1/8" W x 29" H

INTERIOR CHOICES

Four different decorative interiors are included with each fireplace.

The *Glowing Logset* with glowing embers.

The *Platinum* translucent media

The *Mixed Glass* translucent media

The *Orange* translucent media

INSTALLATION CHOICES

Installation With A Fireplace Cabinet

Sterling™ Wood Cabinets

If you are looking for exceptional value and a quick, easy installation, add one of our Sterling Fireplace Cabinets (available in oak or walnut veneer). These cabinets allow the fireplace to be installed against any wall in your home with an outlet. Fireplace Cabinets make it easy to relocate your fireplace at any time, so you can take the beauty and heat to any other room or house.

Face See Pages 4 & 5.

Metro™ Stainless Steel Mantel

As an alternative to wood cabinet mantles, the Metro Mantel is constructed of brushed nickel sheet metal with a textured black powder-coated hearth base. As you can see, the Metro Mantel is a striking contemporary accessory to the 564 Electric Fireplace. All Architectural Double Door faces as well as the rectangular Metropolitan beveled faces will fit this fireplace and this mantle.

Custom Pre-Built Mantel

shown with Artisan™ Charcoal Painted Face.

Ask you Fireplace Xtordinaire dealer about other mantel options for the 564 Electric Fireplace, such as the Windham™ Mantel manufactured by J. C. Huffman Co. shown here. Visit www.jchuffman.com for details on their mantel options.

Installation Without A Fireplace Cabinet

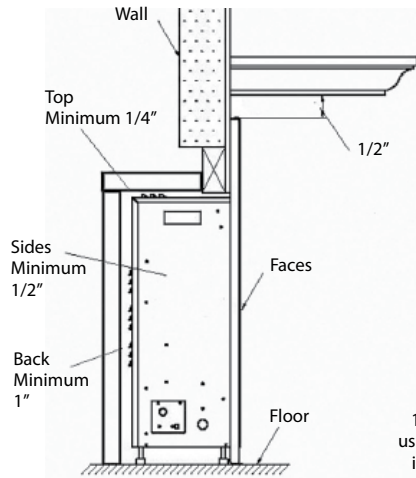

If you want to achieve a flush look, you have the option of building in or framing around your 564 Electric Fireplace. When framing the enclosure you must follow the MINIMUM internal opening dimensions shown below. Before actually beginning the work, please consult with your dealer or go online to www.fireplacex.com for complete instructions.

The fireplace must be able to slide out for service. You must also provide a standard 15 AMP, 110 Volt wall outlet on the inside of the enclosure. It is preferable that the wall outlet be on its own breaker.

Fireplace Dimensions:

- Depth 10-1/16"
- Width 30-1/4"
- Wide to Flange 32-1/4"
- Height 27"

Clearances To Combustibles

(A) Flush To Floor Framing

(B) Raised Framing

CAUTION - Clearance for air circulation beneath the fireplace is critical. DO NOT INSTALL THE FIREPLACE DIRECTLY ON CARPET, OR SIMILAR SURFACES WHICH MAY RESTRICT AIR CIRCULATION.

Installation Into An Existing Fireplace

The 564 Electric Fireplace can also be installed into any existing fireplace opening and utilized as an insert! By adding the optional 8" Panel Set you can convert your old, inefficient fireplace into a wonderful supplemental heat source. This unit will fit most masonry or zero clearance fireplaces.

Panel Covers
44-1/4" W x 38-3/8" H
