Introducing the 4237™ Clean Face Gas Fireplace *The Biggest and Boldest Fire from FirePlaceX®*

FirePlaceX® has pushed the limits of fire once again by creating an extra-large clean face heater-rated gas fireplace that delivers in all areas of performance, design and functionality.

Perfect for large gathering places, from great rooms to grand entryways, the 4237™ is a true showstopper that will make a commanding statement and become the best view in any home. The huge 42” x 37” all-glass viewing area and fire display extend right down to the floor, creating a timeless look with old world charm that resembles a real masonry fireplace.

The 4237™ showcases a big, bold fire that is second to none, featuring the Dancing-Fyre™ burner and incredibly detailed, massive 10-piece Western Timber Log Set. Standard overhead accent lighting illuminates and highlights the glowing flames and log set to add to the magic of the 4237’s ambiance. This accent lighting feature can also be used as mood lighting when the fireplace is not burning, allowing you to utilize and show off the beauty of the 4237™ all year-round.

Versatile style options allow you to completely customize the appearance of the 4237™ to complement any home’s décor, be it rustic, transitional or contemporary. Elegant andirons, designer firebacks and the exclusive hand-hammered IronWorks™ face and trim all offer unique, different looks that add to the beauty of this fireplace.

“The 4237 is the easiest fireplace I’ve ever lived with” – says Travis Industries’ Western Sales Manager, Melodie Kauf. With a 3,000 square foot heating capacity and standard twin 130 CFM fans, this fireplace really delivers the heat; however, GreenSmart™ technology and the standard GreenSmart™ remote allow you to adjust the heat output to a comfortable setting and control every aspect of this fireplace while relaxing in your favorite chair.

Unique Film Cooling Technology allows for close mantel clearances, resulting in more installation possibilities with the 4237™. Optional Power Heat Duct Kits also give you the ability to vent the heat of this fireplace to additional rooms in your home.

The 4237™ shown with the Adjustable Tile Trim Kit, Herringbone Brick Fireback and Lodge Ring Andirons
